Fence

WOOD BRITE

Wood Cleaner & Brightener

What is Wood Brite?

Cleans and de-stains decks, fences and other weathered wood, helping restore the natural, like-new appearance. This product will remove UV damaged, gray wood fibers, ground-in dirt and stains from mildew and algae on decks, fences and other exterior wood structures. Also removes nail bleed and dark tannin bleed from tannin-rich Cedar, Redwood, Mahogany, Ipe, and more.

PRODUCT BENEFITS:

- ★ **Powerful oxygen based formula.**
- ★ **Doesn't contain acids or heavy alkali.**
- ★ **Brightens all types of wood on contact.**
- ★ **Removes algae and other organic stains.**
- ★ **Highly versatile in usage and dilutions.**
- ★ **Easy rinsing and safe on most vegetation.**
- ★ **Environmentally Safe & Biodegradable.**

Dilution Instructions:

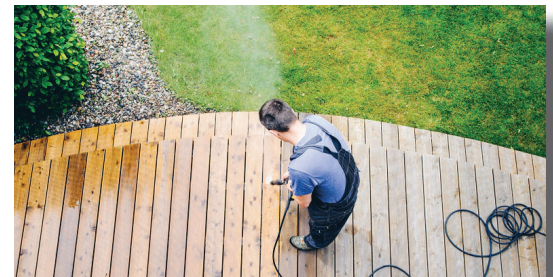

Pre dilute product 2-6oz per gallon if applying straight to surface. Stronger solutions may be required if wood has not been maintained. If applying through an injection system, pre dilute product 1lb per gallon of water and then set ratios to 20-32:1 depending on how dirty the surfaces are. Warm water always works better but is not required. Rinse well after applying with fresh water. It is always recommended to cover expensive or exotic plants to eliminate possible contamination of the soil.

Directions For Use:

Read MSDS and test in a small inconspicuous area. This product is not recommended for use with Sodium Hypochlorite (bleach).

If cleaning weathered wood use caution when applying high pressure as wood quality may suffer. Treated areas will look cleaner than those surrounding which may leave a "spotting" look.

Wood Cleaning

Available Packages

6426-450	450lb Fiber Drum
6426-40	40lb Pail
6426-20	20lb Pail
6426-32	4 x 8lb Container

Our Ecowash Professional Line of products has been specially formulated to make cleaning easier while being environmentally sustainable and 100% biodegradable.
