SPLASH

Chlorine Neutralizer
& Surface Protectant

*Non Toxic, No VOC's
100% Biodegradable*

All Natural, Non Hazardous

Cleaning Is Easier, Faster, & More Efficient

SPLASH

Chlorine Neutralizer & Surface Protectant

Why use Splash?

Sodium Hypochlorite can be one of most destructive chemicals to metals, equipment, and applicators. After repeated applications, metals and equipment will begin to rust and breakdown. We have found a way to help prolong the life of equipment by helping to neutralize left over bleach on surfaces or surfaces that have been in contact with bleach. After the cleaning and rinsing process has been completed, use Splash to finish off the process.

What is Splash?

Splash is an all in one neutralizer, protectant, and wax that will help neutralize the effects of bleach on equipment after cleaning while providing a finish shine on surfaces. Special additives help breakdown chlorine on surfaces and equipment, helping prolong their life and inhibitors will protect metals after use. Will also help prevent spotting on glass and vinyl when used properly. Helps improve customer and operator satisfaction.

Product Benefits:

- One step chlorine neutralizer, protectant, and wax.
- Helps breakdown chlorine in and on equipment.
- Prolongs the life of metals, applicators, and equipment.
- Surfaces will shine after use.
- Great for use on exteriors and equipment.
- Contains citrus oils that help mask bleach odors.
- Environmentally Safe & Biodegradable.

Available Packages	
6437-275	275 Gallon Tote
6437-55	55 Gallon Plastic Drum
6437-30	30 Gallon Plastic Drum
6437-15	15 Gallon Plastic Drum
6437-5	5 Gallon Plastic Pail
6437-4	4 Gallon Case
6437-QT	12 x 32oz Quart Case

Directions For Use:

Always read MSDS before using. Make sure to use proper protective clothing when applying any chemical.

Make sure surfaces and equipment have been thoroughly cleaned and rinsed for best results.

Exterior Wash:

Mix product so that the final use dilution is 4oz per 5 gallons of water. Once product is mixed or prepared to be metered, apply to desired surfaces. Best results will occur if surfaces are cool. The hotter the surface the more potential there will be for spotting (especially on glass). If this is the case, give a quick rinse after. This will help neutralize all surfaces and applicators while leaving a shine.

Equipment Wash:

Mix product so that the final use dilution is 4oz per 5 gallons of water. Once product is mixed or prepared to be metered, apply to desired surfaces. Make sure to apply to all surfaces that bleach has or may have come in contact with. This will prolong the life of the equipment. For heavily contacted surfaces, give the surface a scrub and rinse to ensure proper use.

Special Use Precautions:

- Do not mix with bleach or any bleach product.

Our Ecowash Professional Line of products has been specially formulated to make cleaning easier while being environmentally sustainable and 100% biodegradable.
